

1. INTRODUCTION

1.1 Overview

The Project is about the Education domain where we create a website for a user to view a college or an institution details in order to get information regarding to their domain search.

1.2 Purpose

The main purpose of the project is to create a website on education domain i.e creating a website for a college or a educational institution so that people or a user can easily view the details about the college and get navigated to other categories by the links provided in the website.

2. LITERATURE SURVEY

2.1 Existing problem

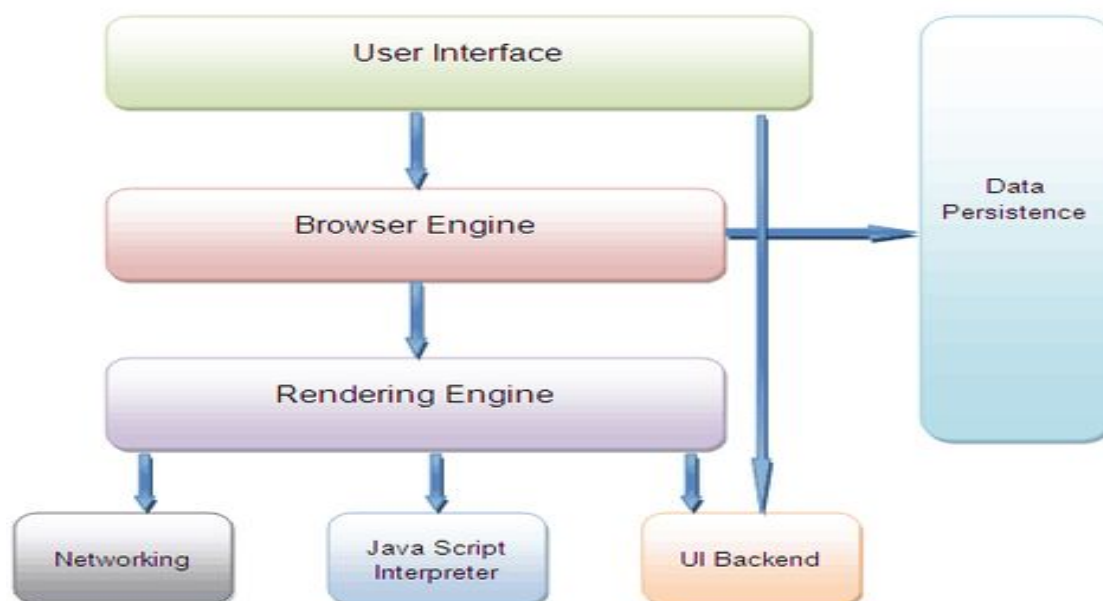

The existing problem before the creation of the website is that users or the people could not be able to find an institution or a college which is related to the education domain in the internet.

2.2 Proposed solution

The proposed solution to this problem is that users are now able to find their desired search result in internet. This makes them easier to locate the areas where they are interested in and knowing information related their search about college.

3. THEORITICAL ANALYSIS

3.1 Block diagram

4. EXPERIMENTAL INVESTIGATIONS

Here from the creation of the website related to education domain we can make it easier for the users to find appropriate and relevant details and information regarding to their search and requirements in the internet.

5. RESULT

Here as a result of doing the above project we are able to create a website for particular college, a user or a person is able to view all the details regarding to particular institution so that it gives them knowledge of related college and helps them in knowing their search result as a whole.

6. ADVANTAGES & DISADVANTAGES

There are many advantages in creating the websites relating to the education domain. Which is to be mainly considered is that when a search regarding a particular domain is done, then it gets directed to main site so that all details about the college is mentioned in the official site of particular college and thus the users can make use of that information of their own purpose.

And the disadvantage includes that there are chances of having fake sites or sites which are not related to official college may bring problems regarding the information provided in the site.

7. APPLICATIONS

The main application of the project includes that for finding details about a particular college and knowing all its information so that it helps in having or getting knowledge about that particular domain by the result obtained by the search engine provided to the user.

8. CONCLUSION

Finally, we conclude that creation of website relating to particular domain and college helps in contributing a lot of information to the user without having to visit the college in person and helps in a lot of other ways too.

9. FUTURE SCOPE

The development of this project surely prompts many new areas of investigation. This project has wide scope to implement it in any Institution/College. First of all the limitations of the project, helps a lot more to make place for future enhancements.
